The Central Sava River Basin – The
Integritysphere of Lonjsko polje
Nature Park

0 25 km

Lonjsko Polje Nature Park

A unique organically evolved landscape with a preserved medieval system of the common pasturing typical of the whole of Central Europe until the 2nd half of the 19th century

Largest riparian hardwood forest ecosystem of the Western Palaearctic

Lonjsko Polje Nature Park

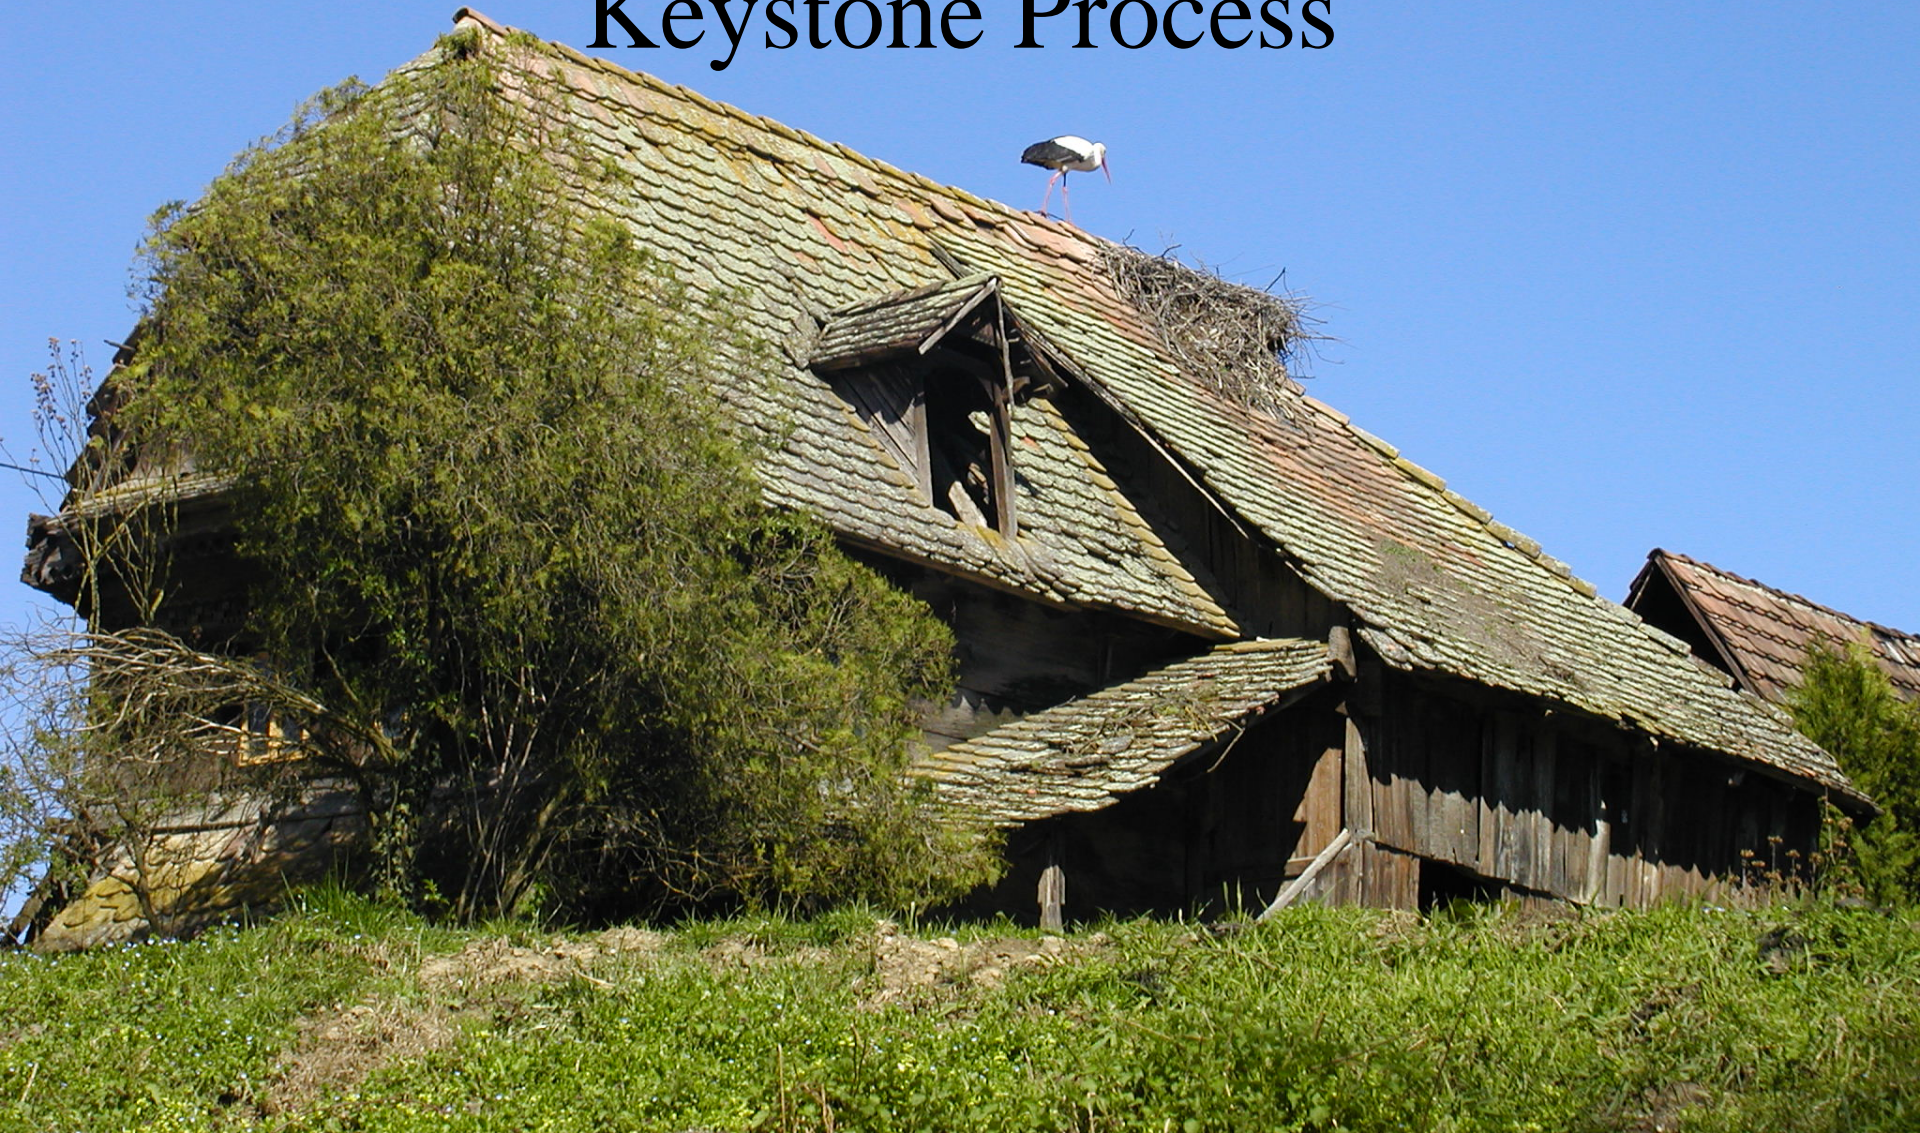

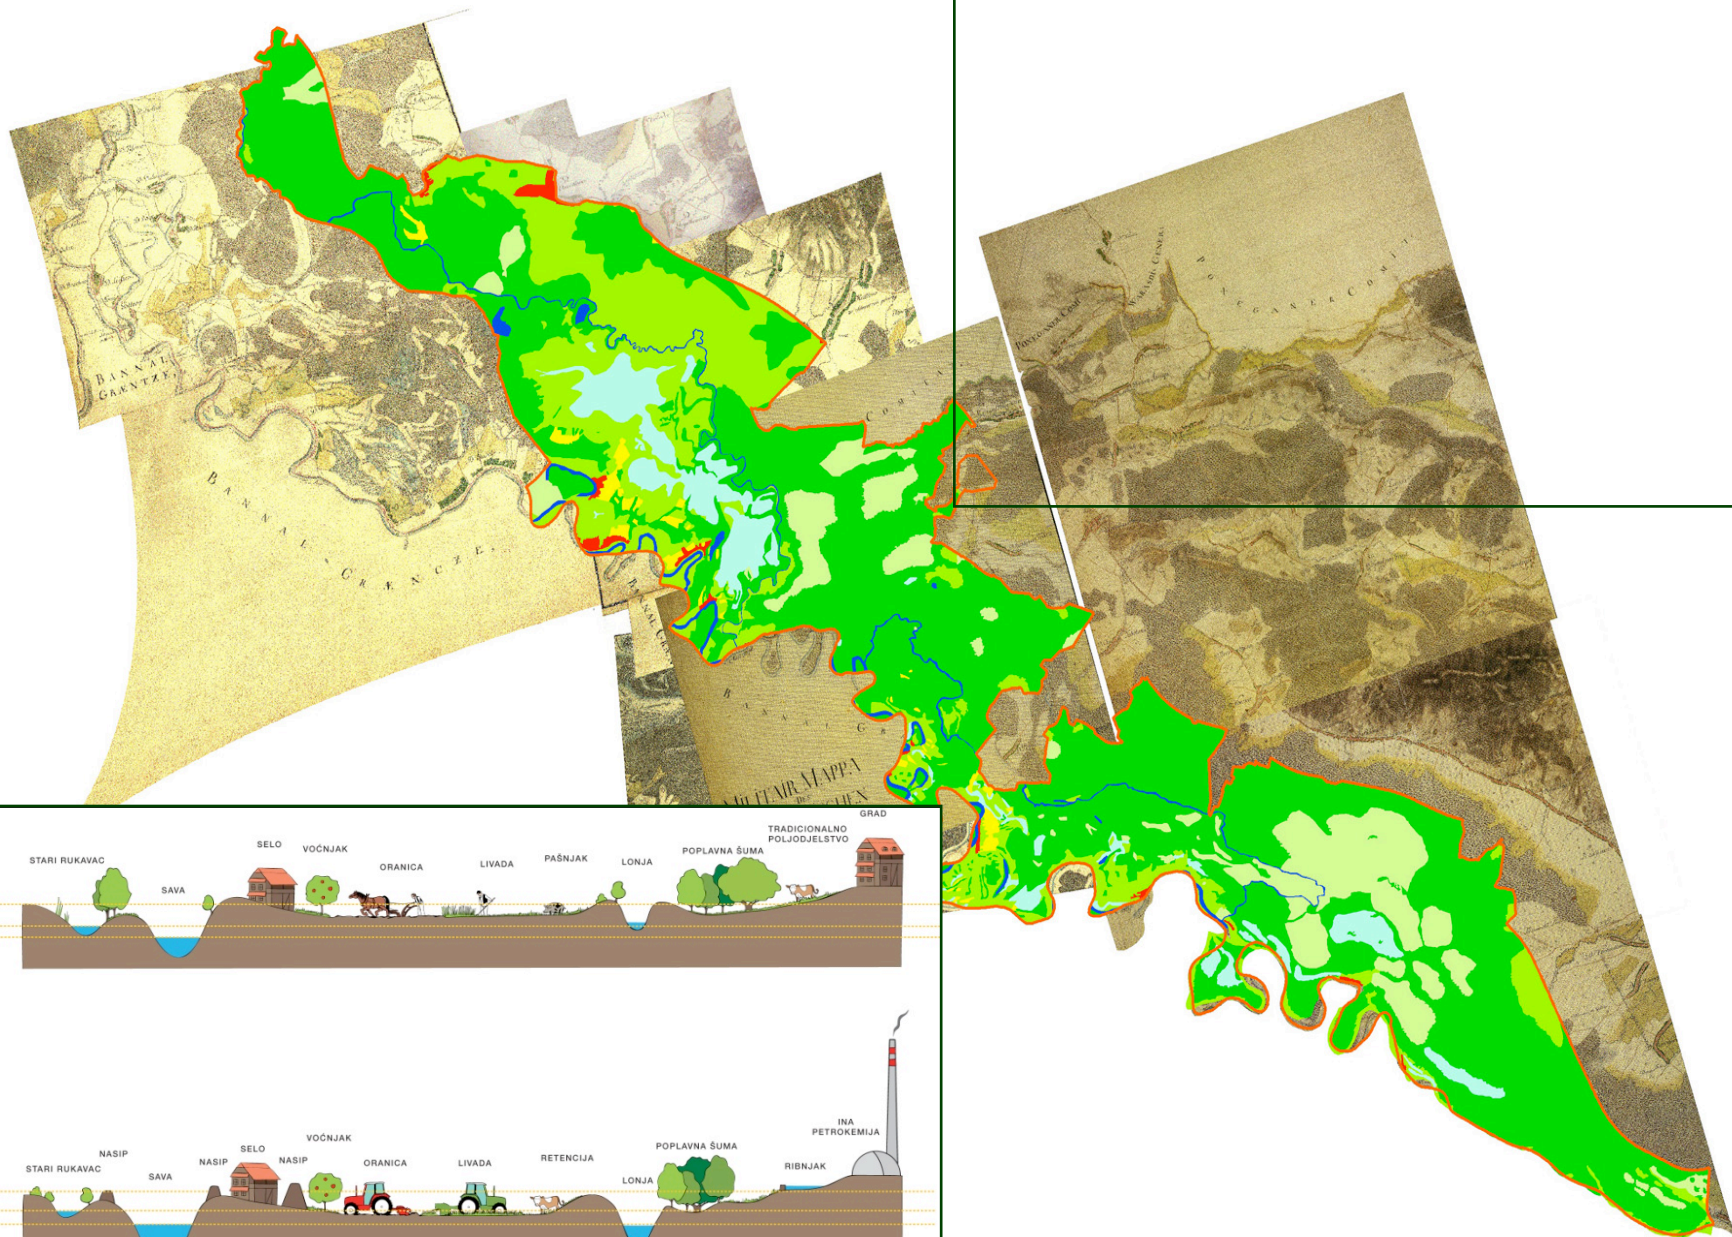

Tradition in managing sustainability in
conditions of change and unpredictability

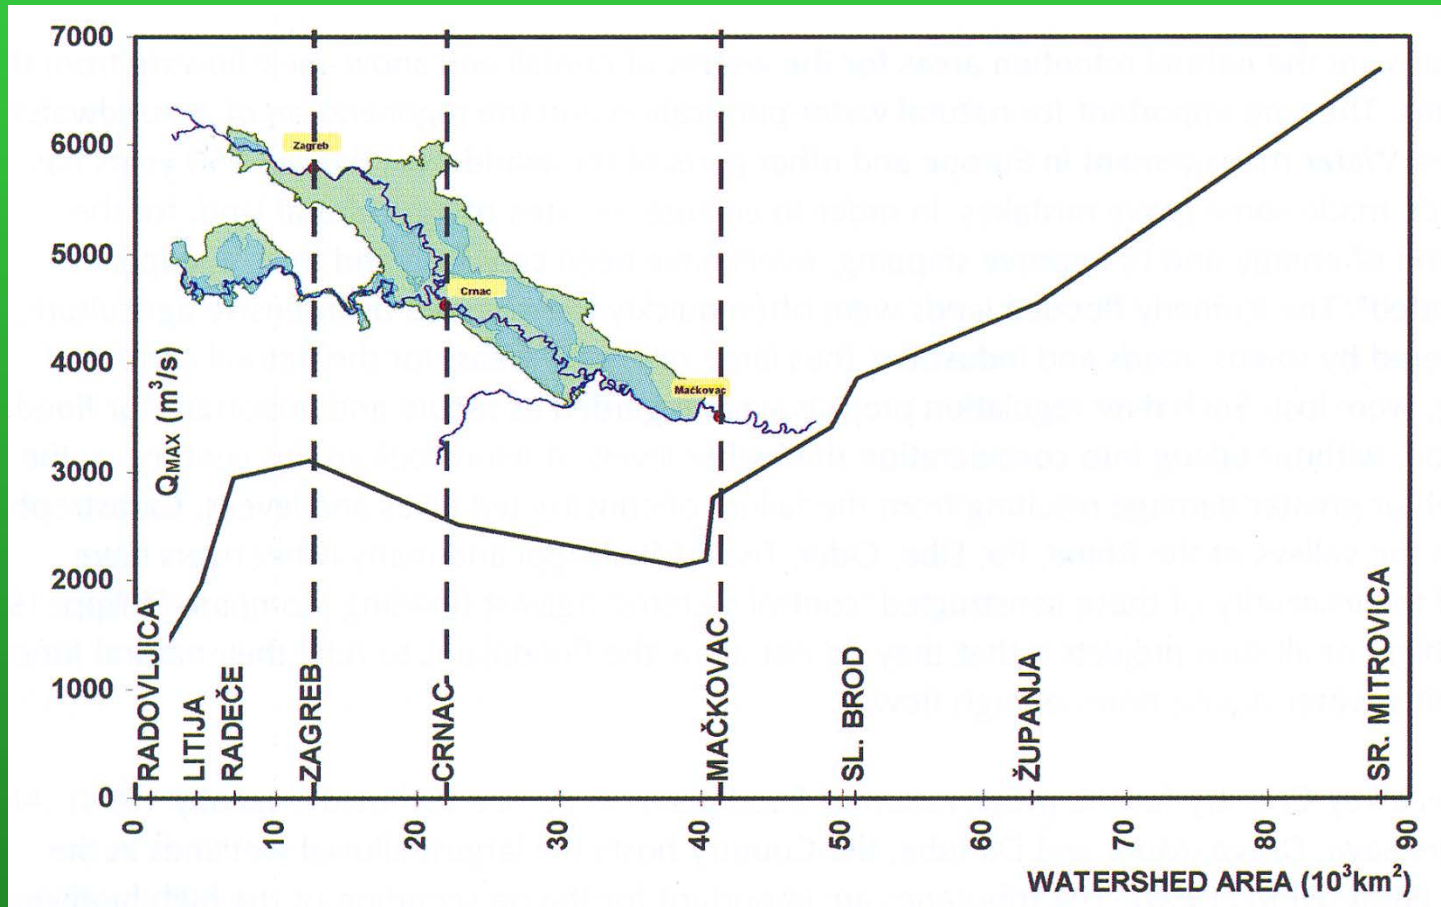

The Military Frontier – The Borderland between Occident and Orient

Adaptation to Flooding – A Cultural Keystone Process

Lonjsko Polje Nature Park

A national and international key facility in the flood control system of the Sava River Basin

Flood Control System

Today: 35,100 ha detention areas
+ natural retention areas (2009)

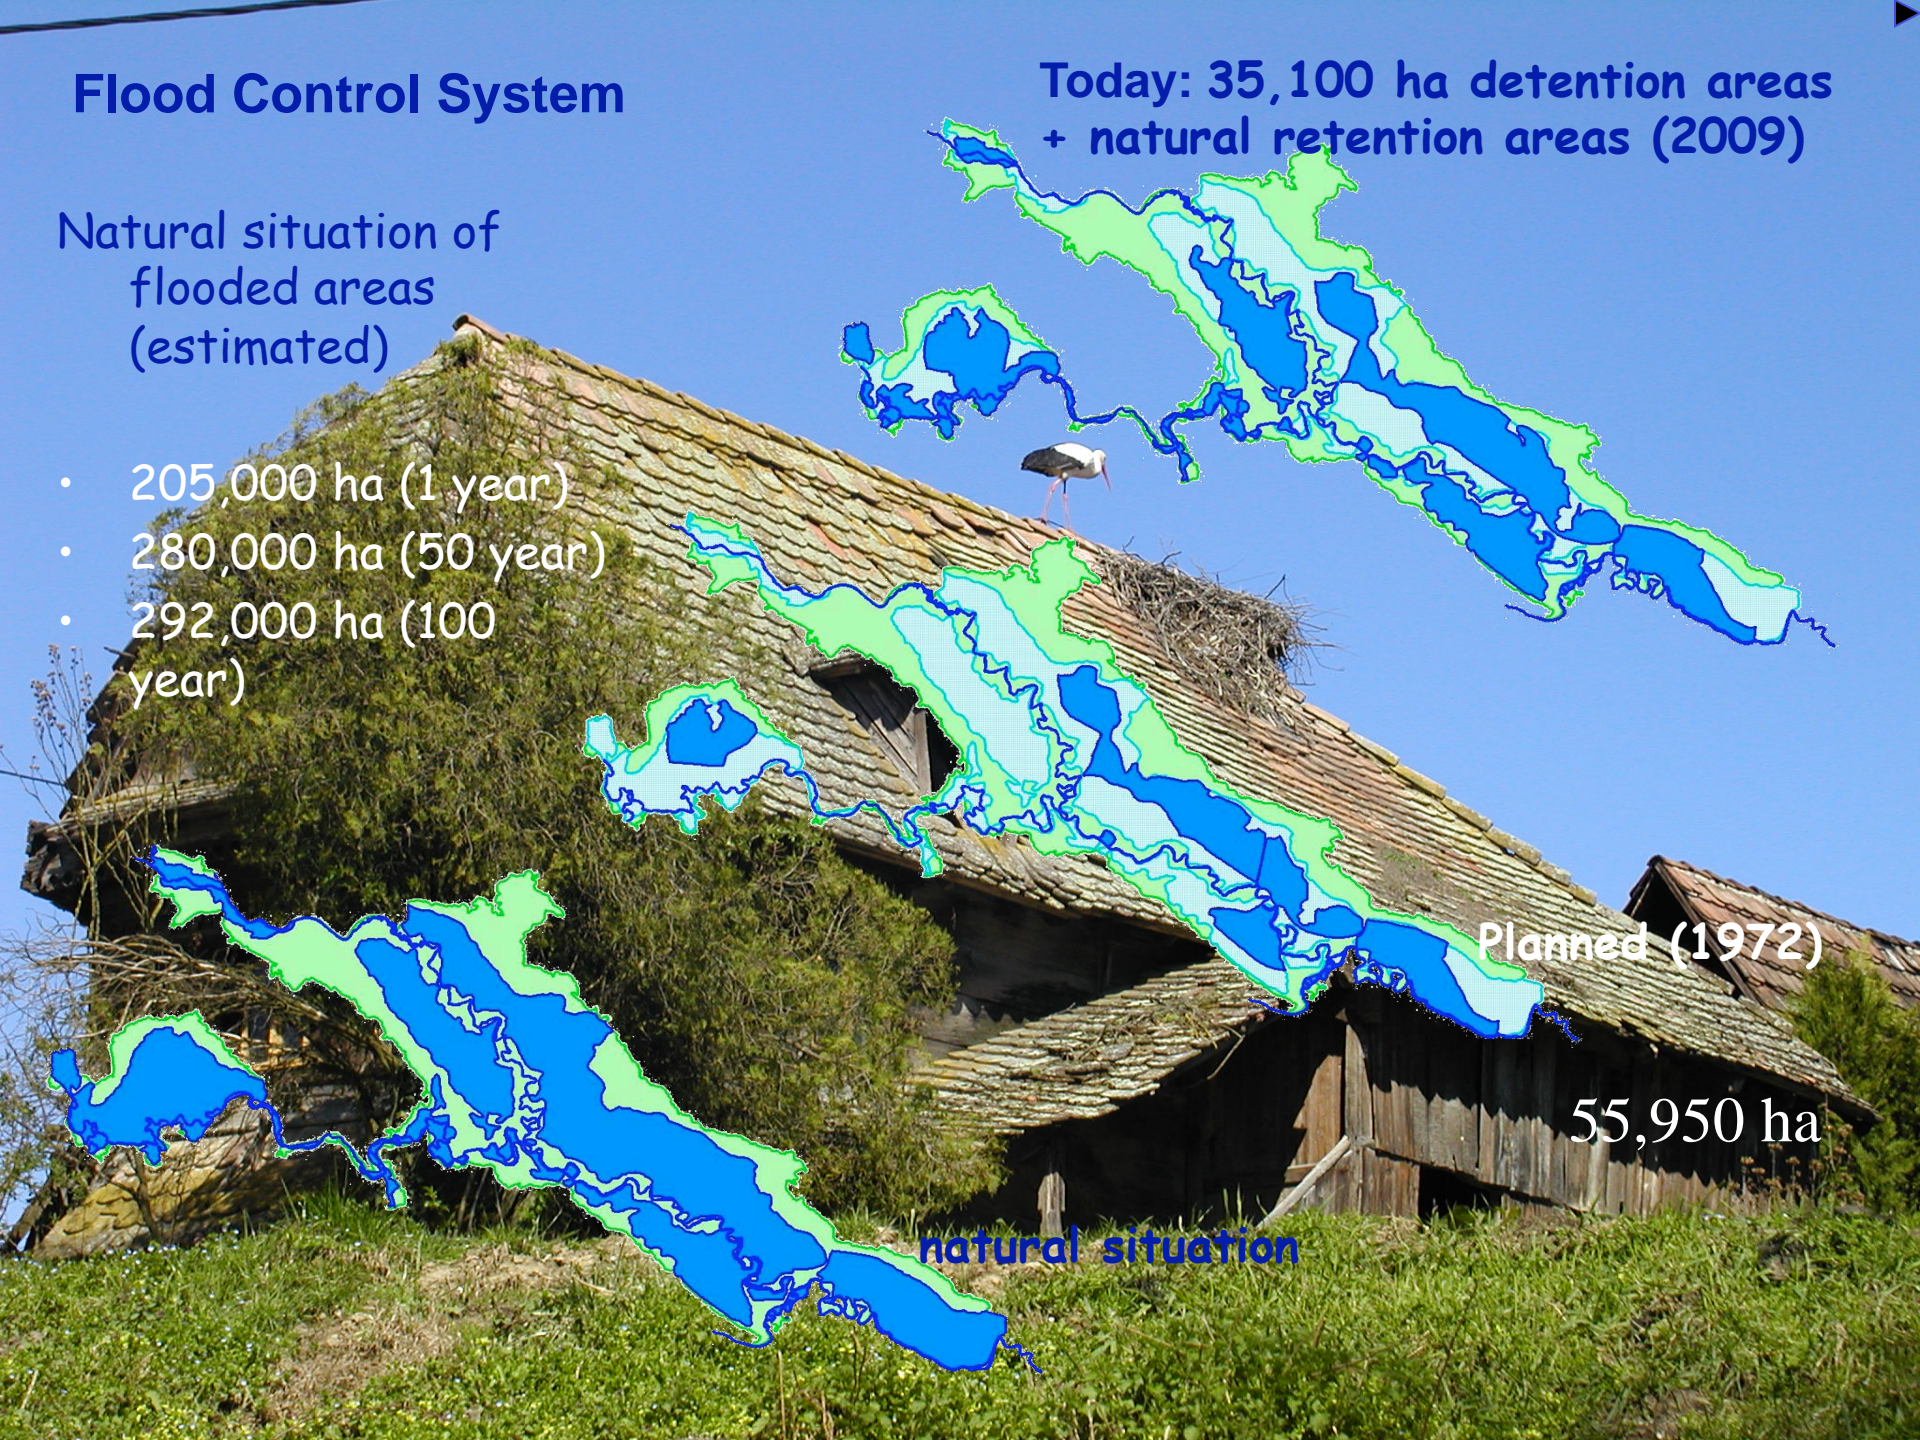

Natural situation of
flooded areas
(estimated)

- 205,000 ha (1 year)
- 280,000 ha (50 year)
- 292,000 ha (100 year)

Planned (1972)

55,950 ha

natural situation

“Start anywhere, just get started”

Proactive conservation management
upscaling wetlands to the basin level

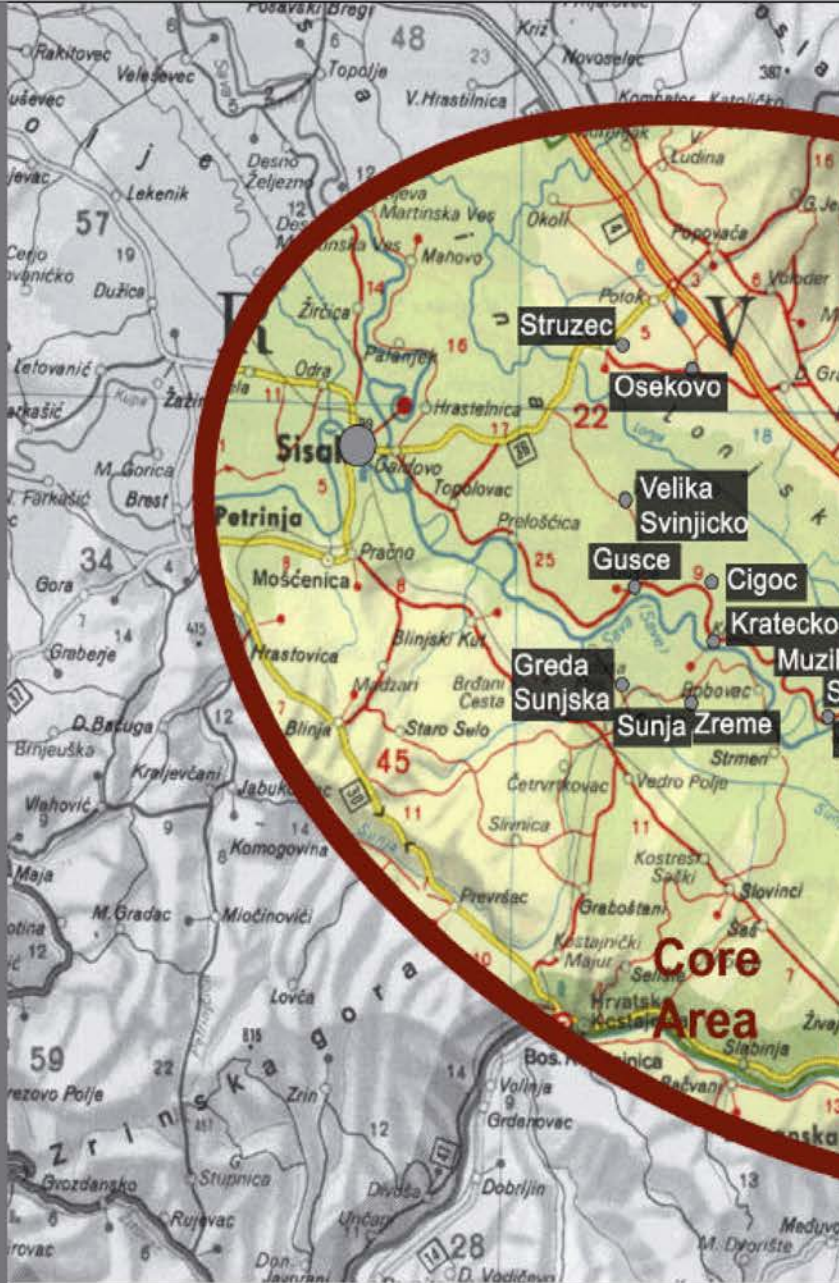

Towards Integrated Management

Iteration of

- ✓ Stakeholder analysis
- ✓ Establish appropriate structures
- ✓ Learn appropriate techniques of integrated management
- ✓ Learn the stakeholders' language
- ✓ Ensure the feed-back of information

An aerial photograph of a forest landscape. A dirt road runs vertically through the center, intersecting a horizontal road. A small building is located at the intersection. The forest is dense and green, with some areas appearing lighter green, possibly due to different tree species or a fire scar. The title text is overlaid on the top half of the image.

The 12 Principles of Managing Sustainability in Conditions of Change and Unpredictability

- Modesty
- Diversity of motivation
- Plainness
- Versatility
- Robustness
- Congruity with the keystone processes
- Integrity
- Dynamic authenticity
- Extensive dispersion in space
- Immanence
- Extensive cores
- Iteration
